

As a 37 year flight attendant I urge you to not allow cellphone usage on commercial aircraft. I cannot even imagine what it will be like when over 400 passengers are crammed into a 747 for 16 hours and phones are ringing and conversations are loud. It will be the added ingredient that sends an already tense environment over the edge. If not for this reason think about a group of terrorists spread over the cabin and coordinating an attack. Please, please do not do this. Sincerely,
